

Job Description: Automotive Tech / Mechanic

Baker Engineering, a high performance engine company in Nunica, MI, has a full-time opening for an experienced Automotive Technician (GM, Ford and Chrysler). Automotive Service Tech, ASE or State of Michigan certification required. Ideal candidate will have experience in the following areas: high performance engine repair, engine tune up, electrical systems, suspension steering and brakes. Additional experience with diagnostics is preferred (late model drive ability, electrical power train, diagnostic software and tuning suites). Individual must be detail oriented, able to communicate effectively, and have all tools needed to do daily automotive tech tasks. A positive attitude and neat/clean appearance are also required. Pay scale pending experience. Company-paid health benefits available. US citizenship required. Email qualifications, summary of experience and pay history to jerovseks@bakerengineeringinc.com.
