

## CNC PROGRAMMER / LEAD MACHINIST.

Here's your chance to work first shift in a clean, climate controlled shop. Minimum of two years of CNC programming experience required. Ability to read blueprints, understanding of G & M codes, and familiarity with multiple axis machining are necessary skills. Prototyping and Job Estimating experience also beneficial. Other pluses: turning and milling experience, Haas machine experience, familiarity with Swiss machining and Creo (formerly Pro-E) software experience and knowledge of ISO:9001 and AS-9100 quality standards. Dependability and ability to work well in a team environment are essential in this small business environment. If you have the expertise and desire to be on the leading edge in a growing company, email resume and salary history to [employment@bakerengineeringinc.com](mailto:employment@bakerengineeringinc.com). Competitive wage based on experience, plus health insurance. Visit [bakerengineeringmfg.com](http://bakerengineeringmfg.com). US citizenship required.
