

## SWISS MACHINE OPERATOR / CNC MACHINIST

If you can run Swiss-style CNC turning centers, here's your chance to work first shift in a clean, climate controlled shop with company paid health insurance. A minimum of two years of CNC turning experience required. Baker Engineering produces prototype and production parts for the aerospace and defense industries. Ability to read blueprints, understanding of G & M codes, and familiarity with multiple axis machining also necessary. Dependability and ability to work well with others are essential. Experience with ISO:9001 and AS-9100 quality standards is a plus. If you have the expertise and desire to be on the leading edge in a growing company, email resume and salary history to [employment@bakerengineeringinc.com](mailto:employment@bakerengineeringinc.com). Competitive wage based on experience. Visit [bakerengineeringmfg.com](http://bakerengineeringmfg.com). US citizenship required.
