

Position: Production Operators
Shift: 2nd & 3rd
Location: Spring Lake, Michigan
Application Process: Email resume to Shannon.Dorner@cooperstandard.com

Job Description

Position Summary:

The Production Operator is responsible for the overall extrusion process of plastic products. This includes but is not limited to ensuring quality based on written specifications and production efficiency. Individuals in this position are expected to follow all safety/operation policies while optimizing the production process through continuous improvement and corrective actions. Regardless of the level, Production Operators are required to assume and perform all duties outlined below based on production and management needs.

Primary Responsibilities:

- Performs efficient set-ups and production by following work standards, monitoring material usage and managing changeovers
- Actively participates in the quality management process by performing dimensional inspections, visual inspections and implementing corrective actions
- Documents measurements and production data utilizing the PDQCR system
- Participates in continuous improvement activities and provides feedback to ensure processes are effective and efficient
- Prepares finished goods for shipment by labeling and packaging according to written specifications
- Identifies, labels and retains non-conforming material and/or product as required
- Provides and acquires cross-training of production processes and procedures
- Conducts daily activities safely by using proper PPE and following all operational work rules

Education and Qualifications: High school diploma or GED required
