

## Engineering Supply & Imaging

Jammed up? Having trouble with printing? Are long and wordy lease agreements from larger companies confusing and hard to get out of? These are questions Engineering Supply and Imaging provide solutions for every day. ESI leads Michigan in printing services that help you get back to focusing on what matters! Since 1990 ESI has been helping customers with large and small format printing. We are a locally owned and operated business with locations in Holland and Grand Rapids (River City Reproductions). We are certified dealers of HP, Epson, KIP, Xerox and our service technicians have over sixty years in field experience. Tell us how we can help, and we will be happy to provide a print solution that will meet your needs.

While competitors offer leasing solutions that are hard to understand and difficult to get out of, we have a rental solution that our customers love to take advantage of. It allows them to worry less and use their printing budget more efficiently. We provide the printer, all the service and all the supplies invoiced once per month based on usage. How simple is that! Ask us about the all-inclusive rental program and you will be glad you did.

Many clients prefer to outsource their printing needs. ESI prints construction documents, large banners, custom signs, and much more! Tell us what you have in mind, and we can put our team on it to provide you with printing that will showcase your project.

Your business may have multiple locations so keep in mind, we sell, service and support our printers locally, regionally, and nationally. ESI is a member of the Reprographic Services Association which allows use of fellow RSA partners from all over the country to support your project. Ask how we can help you with a print solution both here in Michigan and out of state. Learn more at [www.engineeringsupply.com](http://www.engineeringsupply.com)
